1. Understand the Internet An essential skill for any internet user is to learn how to navigate the internet. The first and most important step in using Photoshop is to learn the basics of navigation. For example, to edit your picture using PS, you need to know how to open and close it. You can learn the basics of image editing on the internet by watching a few instructional videos. Most video tutorials are available on many sites on YouTube, such as the Adobe website. These YouTube videos are called webmovies. 2. Know the Image Editing Process It's not enough to just open the image and start changing things. Image editing requires a process that can be daunting if you don't fully understand it. An understanding of the image editing process involves: Image type: For example, digital or film. For example, digital or film. Color mode: RGB, CMYK, Lab RGB, CMYK, Lab Color temperature: Kelvin temperature scale Kelvin temperature scale Resizing Cropping and flipping Lifting and altering colors Adjusting Levels Photoshop effects and filters Learning this process can take a lot of trial and error. However, it's best to practice before editing your first image. The easiest way to learn the process is to start by opening a sample image on a site like Pixabay, where you can browse a collection of free images for inspiration. 3. Learn Photoshop Photoshop is an extremely powerful and versatile program. As a beginner, you'll need to learn some aspects of using Photoshop's advanced features. One of the first steps is learning what each icon means in Photoshop. Knowing what each icon means is helpful in knowing how to understand and use the system. Start by downloading the latest copy of Photoshop. The free version is enough to get started. 4. Understand the Difference Between Photoshop For ease of use, Photoshop is split into two components: Photoshop and Photoshop Elements. You can purchase Photoshop for the same price as Photoshop Elements. This is what the program looks like when you install it: Photoshop and Photoshop Elements feature different functions. Some of the main differences between them are: Photoshop is a true Photoshop, meaning that it contains all of the professional tools available in Photoshop. The PSD file format is a file format that allows you to work with images in
